Physical Geography-1(Geomorphology)	DSC-1 (3)	3	0	0	10+2 from any recognized Board
Practical	DSC-2 (1)	0	0	2	

Learning Objectives

The course lays foundation of the fundamentals of geomorphology, a sub-branch of Physical Geography. This is important to develop understanding about their immediate surroundings.

Learning outcomes

- To develop understanding of theoretical concepts related to formation of the earth.
- To create strong foundation of various geomorphologic phenomena which are playing important role in shaping the earth surface.
- To extend knowledge of landform dynamics and resulted topographies.
- To cover basic contents for various competitive examinations such as civil services, UGC NET-JRF, state level PSC exams and so on.

Paper – I

Course Title:	Physical Geography-1(Geomorphology)	Course Code: 24 BGS5101T
Total Lecture hour 40		
Unit I	The Nature and Scope of Geomorphology. Theories of Origin of Earth; Kant, Laplace, James Jeans and Big Bang. Geological Time Scale. Interior Structure of Earth. Rocks; Origin and Types.	Hours 10
Unit II	Origin of Continents and Oceans; Theories of Lowthian Green, Continental Drift and Plate-tectonics. Major Phases of Orogeny. Types of Mountains. Theories of Mountain Building; Kober, Holmes, Taylor, Wagener and Plate-tectonics.	10
Unit III	Isostasy; Concept and Views of Airy and Pratt. Endo-genetic and Exo-genetic Forces. Earthquake and Volcanicity. Earth Movements and Related Landforms.	10
Unit IV	Denudation; Weathering and Erosion. Erosional cycle of Davis and Penck. Erosional and Depositional Works of River, Wind, Underground Water, Sea Waves and Glacier.	10

Physical Geography-II (Climatology and Oceanography)	DSC-3 (3)	3	0	0	10+2 from any recognized Board
Practical	DSC-4 (1)	0	0	2	

Learning Objectives

This is a conceptual course which lays Foundation of the fundamentals of Climatology and Oceanography, the two sub-branches of Physical Geography. This paper is important for developing concepts about various climatic patterns and oceanic circulation.

Learning outcomes

- To make students understand the basics of climatic phenomena and ocean characteristics.
- To develop understanding of ocean water dynamics and climatic circulations.
- To develop understanding of the impact of climatic phenomenon on human activities and importance of oceanic resources.
- To make familiar with contemporary climatic issues.
- To cover basic contents for various competitive examinations such as civil services, UGC NET-JRF, state level PSC exams and so on.

Paper – II

Course Title:	Physical Geography-II(Climatology and Oceanography)	Course Code: 24BGS5201T
Total Lecture hour	40	Hours
Unit I	Composition and Structure of Atmosphere. Insolation and Heat Budget. Distribution of Atmospheric Temperature. Atmospheric Pressure; Pressure belts and Wind Circulation. Planetary, Periodic and Local Winds.	10
Unit II	Atmospheric moisture: Types of Humidity. Process of Cloud Formation. Types of Clouds. Types of Precipitation. Distribution of Rainfall. Air Masses and Fronts. Cyclones- Tropical and Temperate Cyclones. Climatic Classification by Koppen and Thornthwaite. Contemporary issues; Climate Change, Global Warming, Acid Rain, Urban Heat Island.	10
Unit III	Nature and scope of Oceanography. Ocean Bottom Reliefs; Indian, Atlantic and Pacific Oceans. Ocean Temperature Distribution. Ocean Salinity; Sources, Controlling Factors and Distribution. Ocean Deposits.	10
Unit IV	Ocean Currents; Influencing Factors, Types and Impacts. Tides; Factors and Types. Theories of origin of Tides (Equilibrium, Progressive Wave and Stationary Wave Theories). Coral reefs; Conditions of Growth and Types. Theories of Darwin, Murray and Daly. Oceans Resources and Blue Economy.	10

Practical Paper – II

Course Title:	Practical		Course Code: 24BGS5201P
Total Lecture hour	26	Hours	
Unit I	Methods of Relief Representations; Hachure, Hill shading, Spot Height, Bench Mark, Trigonometric Stations, Form Lines and Contour Lines. Principles of Contouring. Interpolation Method. Composite Methods of Relief Representation.	8	
Unit II	Representation of Relief by Contours; Conical Hill, Concave Slope, Convex Slope, Escarpment, Cliff, Ridge, Gorge, 'U' Shaped Valley, 'V' Shaped Valley, Plateau, Waterfall, Ox-Bow Lake, Ria Coast, Fiord Coast. Drawing Profiles; Serial, Superimposed, Projected and Composite profiles.	8	
Unit III	Weather Instruments; Thermometers, Barometers, Rain Guage. Introduction to Weather Maps. Weather Symbols. Interpretation of Weather Maps.	10

Human Geography	DSC-5 (3)	3	0	0	10+2 from any recognized Board
Practical	DSC-6 (1)	0	0	2	

Learning Objectives

This course covers various dimensions of Human Geography. This is important for developing understanding on changing man-environment relationships, human population and economic activities, human settlements and so on.

Learning outcomes

- To introduce with branches of human geography and different concepts of man –environment relationship.
- To develop familiarity with different races and tribes of the world and interpretation of the world population trends.
- To visualize various patterns of urbanization, migration and settlement.
- To learn about the population resource relationship, concept of development and population problems.
- To cover basic contents for various competitive examinations such as civil services, UGC NET-JRF, state level PSC exams and so on.

Paper – III

Course Title:	Human Geography		Course Code: 24BGS6301T
Total Lecture hour	40		Hours
Unit I	Definition, Nature and Scope of Human Geography. Paradigms of Man-Environment Relationship; Determinism, Possibilism and Neo-determinism. Fundamental Principles of Human Geography; Principle of Activity, Principle of Areal Differentiation, Principal of Terrestrial Unity.		10
Unit II	Human Races; Types and Distribution (Classification of G. Taylor). Study of Socio-economic Life of Tribes; Eskimo, Bushmen, Pygmies, Santhal, Nagas and Bhil. World Population; Growth, Density and Distribution. Concept of Optimum Population.		10
Unit III	Migration; Definition, Causes, Types and Consequences. World Migration Patterns. Population-Resource Regions. Population Dividend and Problems. World Population Policies. Concept of Development.		10
Unit IV	Human Settlements; Site and Situation. Types and Morphology of Rural Settlements. Classification and Morphology of Urban Settlements. Trends and Patterns Urbanisation in the World. Problems of Urbanization.		10

Practical Paper – III

Course Title: Practical		Course Code: 24BGS6301P	
Total Lecture hour 26			Hours
Unit I	Nature, Scope and History of Cartography. Cartographic Techniques and Tools. Cartographic Symbols. Definition, Basic Concepts. Purpose and Types of Maps		8
Unit II	Diagrams; Meaning and Classification. One dimensional Diagrams; Line Diagram, Bar Diagram, Pyramid Diagram. Two Dimensional Diagrams; Square, Rectangle and Circle (Pie Diagram). Three Dimensional Diagrams; Cube, Sphere and Block Pile.		8
Unit III	Prismatic Compass Survey; Details of Instruments. Open and Closed Traverse Methods, Graphical Method of Eliminating the closing error.		10
Reference Books:

Economic and Resource Geography	DSC-7 (3)	3	0	0	10+2 from any recognized Board
Practical	DSC-8 (1)	0	0	2	

Learning Objectives

This course will develop understanding of key concepts related to natural resources and their conservation, agricultural and industrial activities and transport patterns.

Learning outcomes

- To make familiar with the meaning, approaches and concepts of economic geography.
- To develop understanding about types of economies and economic activities.
- To make them understand about the major natural resources, their conservation and principal crops of the world.
- To examine the patterns of world industrialization and transport patterns.
- To cover basic contents for various competitive examinations such as civil services, UGC NET-JRF, state level PSC exams and so on.

Paper – IV

Course Title:	Economic and Resource Geography		Course Code: 24BGS6401T
Total Lecture hour	40		Hours
Unit I	Definition, Nature and Scope of Economic Geography. Approaches in Economic Geography. Economic Geography and its relation with Allied Subjects. Classification of Economies. Classification of Economic Activities; Primary, Secondary, Tertiary and Quaternary Activities.		10
Unit II	Concept and Classification of Resources. Mineral Resources; Iron, Manganese, Bauxite, Lime Stone, Dolomite. Energy Resources: Coal, Petroleum and Hydroelectricity. Resource Conservation. World Energy Crisis.		10
Unit III	Types of Agriculture and Agricultural Regions of the World. Major Crops; Rice, Wheat, Tea, Coffee, Cotton and Sugarcane. Livestock. World Agricultural Problems and Food Security.		10
Unit IV	Classification of Industries. Major Industries; Iron and Steel, Cotton Textile and Automobile. Industrial Regions of the World. Special Economic Zones and Technology Parks. World Transport Patterns; Land, Water, and Air.		10
